

Advanced Global Holdings

## We Work for You

We provide creative emission solutions by combining multiple technologies in simplified applications.

### Creative Emission Solutions

- EPA Certification
- Emissions Management
  - Carryover Certificates
  - In-Use Testing
  - Regulatory Reporting
  - Self-certification
- Certified Emission kits
- Grant Funding Assistance

## Emissions Management Programs

We are committed to helping customers meet regulatory emissions requirements in the Rail and Marine industries. We actively coordinate emission tests, source emission compliant components, process certificate applications and provide management services to satisfy all EPA emission regulations beyond certification. We offer options to clients who require assistance navigating EPA regulations and we tailor solutions to meet each client's individual needs.

### Grant Funding

We work with air regulatory groups (public) and private industry to develop cost effective, emissions friendly solutions for the public-private partnerships we bring together. These grant funds are used to upgrade fleets through emission friendly applications.
